# Swing Double Monitor Arm

Assembly Instructions

## INCLUDED IN THE BOX

Arm Base

Monitor Mounting Plate

Monitor Screw x8

Allen Wrench x2

Monitor Arm x2

1. Position the base on the desk edge and use the 6mm allen wrench provided to tightly clamp the base onto the desk top.
2. Slot each monitor arm onto the base and use the 3mm allen wrench provided to tightly pin the arm to the base.

3. Install two monitor mounting screws into your monitor using the 3mm allen wrench. Carefully hang the monitor on the monitor mounting plate, engaging the two holes that best align to the monitor screws. Install the remaining monitor mounting screws in the lower half of the mounting plate using the allen wrench.

4. Use the 5mm allen wrench to adjust the arm tension in two spots, to hold the monitor(s) in the desired position.

HEADS UP
Be sure to leave adequate cable slack when utilizing the built-in cable channeling feature and especially if using the monitor arm with an adjustable height desk.
